

DAISY DISC CORPORATION MISSION STATEMENT

Overview

Daisy Disc Corporation endeavors to provide complete logistical service solutions for our customer's. We are dedicated to providing our services in a cost-effective manner and by utilizing ISO9000:2000 certified procedures. We work constantly to improve our service and make it easier for customers and vendors to do business with us.

Services

Logistics outsourcing and product return services with warranty administration are the two primary Daisy Disc service offerings. We will improve processes and the menu of items to make these services more acceptable to a wider market. These services eliminate the need for our customers to invest in facilities, staff, training, and reporting systems.

Features Include:

- EDI order processing.
- Inventory control and tracking.
- Advance shipment of replacement items.
- Committed fill rates for orders and same day shipping.
- Receipt of material from customer operations and their customers.
- Evaluation of returned items for OEM Warranty.
- Warranty administration and recovery.
- Test and repair of returned items.
- Data erasure.
- Custom reporting.

Evaluation, testing, and repair services provide customers with a convenient and cost effective means of discovering the condition of their product and recovering any product value. We will continue to improve our sales process, and make it easy for our customers to do business with us.

Features Include

- Competitive fixed fee pricing.
- Skilled Engineers.
